

Apartment entry requires bi-key access through the recessed glass door located approximately 22 metres from the North Terrace corner of the building along Charles Street (you will see the SAAS marker under the bi-key door lock). Immediately below the apartment "111" letterbox another SAAS marker identifies the bi-key lock to a letter box protecting a further bi-key lock slide-bar that will give you access to a universal FOB for building access. Attached to this FOB will be building access information that describes the fastest way to traverse through the building.
